

HAUXHUNT

Residential Rental Platform Comprehensive App Feature Catalogue v2.0

AI-native residential rental infrastructure for property discovery, matching, trust, transactions, and tenancy management.

Document Classification: Confidential - Internal Product Planning

Product Scope

HauxHunt is an end-to-end digital infrastructure layer for long-term residential rentals. It connects tenants with verified landlords and supports the rental journey from intelligent property discovery and recommendation through viewing, application, lease execution, payments, move-in, tenancy, renewal, and move-out.

Strategic technology hierarchy: AI Rental Assistant and recommendation intelligence form a core intelligence layer. AR and immersive apartment experiences are supporting discovery features and are not treated as the core HauxHunt thesis.

1. Authentication & Accounts

- Tenant, landlord, and property manager registration
- Secure login and session management
- Multi-factor authentication
- Password and account recovery
- Role-based permissions
- Device and session management
- Account deactivation and closure

2. User Profiles

- Tenant profiles and rental preferences
- Landlord profiles and trust indicators
- Property manager profiles
- Profile completion workflows
- Privacy and communication settings
- Reusable verified profile information

3. Identity Verification

- Government ID verification
- Selfie and liveness checks where applicable
- Tiered verification levels
- Landlord verification before high-trust actions
- Organization and property manager verification
- Periodic re-verification
- Verification remediation and appeals

4. HauxHunt AI Rental Assistant

- Natural-language apartment search
- Conversational rental discovery
- AI apartment recommendations based on budget, location, lifestyle, commute, and preferences

- Explainable recommendations showing why a home matches
- AI-generated apartment shortlists
- Property comparison assistant
- Trade-off analysis between apartments
- Alternative neighbourhood suggestions
- Total move-in cost guidance
- Listing question answering grounded in available property data
- Viewing recommendation and scheduling assistance
- Application journey guidance
- Lease and rental process guidance within approved informational boundaries
- Persistent rental preference profile
- Preference learning from eligible user interactions
- New-listing match monitoring
- High-match property alerts
- Rental lifecycle assistance from discovery through move-out

5. AI Recommendation & Matching Engine

- Tenant-to-property matching scores
- Multi-factor preference matching
- Budget-fit scoring
- Location and commute-fit signals
- Amenity and lifestyle matching
- Availability matching
- Trust and verification signals in ranking
- Recommendation feedback loops
- Cold-start recommendation logic
- Recommendation diversity controls
- Personalized ranking
- Match-quality analytics
- Recommendation explanation generation
- Human-review and safety controls for sensitive automated decisions

6. Property Listings

- Create and save property listing drafts
- Structured residential property details
- Bedrooms, bathrooms, furnishing, amenities, and rules
- Rent, deposits, and known fee disclosure
- Photo, video, floor-plan, and virtual-tour media

- Availability and occupancy status
- Listing editing and version history
- Listing performance analytics
- Multi-property portfolio management

7. Property Verification

- Ownership or marketing authorization evidence
- Address and location validation
- Duplicate property detection
- Media authenticity checks
- Risk-based physical inspections
- Property verification levels and badges
- Periodic re-verification
- Property verification appeals

8. Search & Discovery

- Keyword and location search
- Advanced rent and property filters
- Map-based search
- Relevance-based ranking
- AI-assisted search
- Personalized discovery
- Saved searches
- New-listing alerts
- Recently viewed properties
- Similar property recommendations
- Zero-result search recovery

9. Property Details

- Property media gallery
- Complete property summary
- Transparent pricing and fee breakdown
- Amenities and features
- Floor plans
- Location and neighbourhood information
- Landlord or manager profile
- Property reviews and history signals
- Verification badges

- Save, share, and compare
- Ask HauxHunt AI about this property
- Report suspicious or inaccurate listings

10. Immersive & AR Property Experience

- 360-degree apartment tours
- Interactive virtual walkthroughs
- Remote guided property tours
- Interactive property hotspots
- Room and layout exploration
- AR-assisted apartment viewing on supported devices
- AR furniture placement
- Virtual furnishing concepts
- Empty-to-furnished visualization
- Room dimension and space visualization where supported
- AI-assisted tour questions
- Immersive media quality controls
- Standard photo and video fallback when immersive media is unavailable

11. Messaging & Communication

- Direct tenant-landlord messaging
- Real-time synchronization
- Image and document attachments
- Voice notes where enabled
- Delivery and read receipts
- Typing indicators
- Conversation search
- Archive, pin, and mute
- Blocking and reporting
- Spam and abuse detection
- Authorized communication audit history

12. Property Viewing & Booking

- In-person and virtual viewing requests
- Landlord availability calendar
- Booking conflict detection
- Confirm or decline requests
- Rescheduling and cancellation

- Automated reminders
- Calendar integration
- Virtual viewing access
- Attendance and check-in tracking
- Post-viewing feedback

13. Rental Applications

- Digital rental applications
- Save drafts
- Reusable applicant information
- Supporting document uploads
- Application status tracking
- Landlord review workspace
- Additional information requests
- Screening checks where lawful
- Application withdrawal
- Approval and conditional approval
- Application history and audit log

14. Lease Management

- Lease generation from approved templates
- Jurisdiction-aware templates
- Controlled lease review
- Electronic signature workflows
- Signing progress tracking
- Secure lease storage
- Document version control
- Lease amendments
- Renewals and extensions
- Termination workflows
- Lease lifecycle audit history

15. Escrow & Protected Funds

- Protected funds workflow for eligible transactions
- Escrow funding and deposit tracking
- Balance and state tracking
- Conditional fund release
- Milestone releases where appropriate

- Dispute holds
- Partial releases
- Eligible refunds
- Escrow statements
- Daily reconciliation
- Financial audit trails and sensitive-action approvals

16. Rent Payments

- Rent schedules based on lease terms
- Payment reminders
- Supported local payment methods
- Recurring payment support where available
- Payment status tracking
- Failed payment recovery
- Digital receipts
- Tenant payment history
- Landlord payment records
- Payment reconciliation
- Accounting data integration

17. Security Deposits

- Deposit collection and recording
- Deposit status tracking
- Deposit ledger
- Move-out reconciliation
- Documented deduction evidence
- Partial refunds
- Deposit dispute workflow
- Deposit notifications and deadlines

18. Move-In Management

- Move-in scheduling
- Pre-move inspection
- Digital inspection checklist
- Photo and video condition evidence
- Inventory confirmation
- Meter reading records
- Key handover tracking

- Utility tasks
- Digital move-in acknowledgment
- Tenancy activation

19. Move-Out Management

- Move-out notice workflow
- Exit inspection scheduling
- Final condition report
- Inventory reconciliation
- Damage assessment and evidence
- Utility settlement tasks
- Key return tracking
- Deposit reconciliation
- Tenancy closure

20. Reviews & Reputation

- Verified-transaction reviews
- Two-sided tenant and landlord reviews
- Property reviews
- Star ratings
- Structured rating categories
- Written feedback
- Review invitations
- Weighted reputation scores
- Trust badges
- Review moderation
- Review appeals
- Fake and coordinated review detection

21. Fraud Detection & Risk

- Risk scoring across identity, property, behaviour, and transactions
- Suspicious login and account takeover detection
- Fake listing detection
- Duplicate identity detection
- Document fraud signals
- Behavioural anomaly detection
- Payment risk monitoring
- Configurable rules engine

- Automated interventions
- Fraud case management
- False-positive review and appeals
- Continuous monitoring

22. Dispute Resolution

- Dispute case creation
- Property, payment, deposit, lease, conduct, identity, and fraud categories
- Evidence uploads
- Case status tracking
- Case manager communication
- Mediation
- Investigation
- Decision and resolution recording
- Settlement tracking
- Appeals
- SLA tracking
- Case audit trail

23. Notifications & Alerts

- Push, email, and in-app notifications
- Unread badges
- Saved-search and listing alerts
- AI high-match property alerts
- Viewing reminders
- Application updates
- Lease alerts
- Payment alerts
- Verification alerts
- Dispute alerts
- Notification preferences

24. Personalization & Retention

- Saved properties
- Property comparison
- Saved searches
- Personalized recommendations
- Rental preference profile

- Recently viewed homes
- AI preference learning
- Rental journey continuity across future rental cycles

25. Landlord & Property Manager Tools

- Portfolio dashboard
- Listing performance dashboard
- Enquiry management
- Viewing calendar
- Application management
- Lease workspace
- Rent tracking
- Tenant records
- Move-in and move-out management
- Reputation management
- Operational task notifications

26. Tenant Rental Hub

- Tenant dashboard
- AI Rental Assistant access
- Application centre
- Viewing schedule
- Lease vault
- Payment centre
- Digital receipts and payment history
- Tenancy timeline
- Move-in and move-out tasks
- Dispute centre
- Platform rental history

27. Analytics & Marketplace Intelligence

- Search analytics
- Zero-result and search-success metrics
- Marketplace liquidity metrics by location and price band
- Listing conversion funnel
- Viewing and no-show analytics
- Application analytics
- Lease analytics

- Payment and reconciliation analytics
- Verification and trust analytics
- Fraud and dispute analytics
- AI recommendation quality metrics
- Match acceptance and recommendation conversion analytics
- Standard event taxonomy
- Internal operational dashboards

28. Administration & Operations

- Internal admin console
- Internal roles and permissions
- Identity and property manual-review queues
- Fraud and dispute case assignment
- Immutable audit logs
- Policy enforcement tools
- Configurable workflow rules
- SLA monitoring
- Incident and exception handling
- Data retention controls
- Compliance reporting

29. Security, Privacy, AI Governance & Product Quality

- Encryption in transit and at rest
- Role-based access control
- Least-privilege internal access
- Secure file validation and scanning
- Consent management
- Privacy controls
- Critical transaction audit trails
- AI recommendation monitoring
- AI output quality and safety controls
- Model and prompt version tracking where applicable
- Accessibility standards
- Responsive web and mobile experiences
- Performance and reliability monitoring
- Clear error and recovery states

Feature Scope Summary

HauxHunt's v2.0 catalogue contains **313 named capabilities across 29 product domains**. The catalogue represents the intended full-platform capability set and is not an MVP launch commitment.

Recommended Product Sequencing

Phase	Primary Capability Focus
MVP / Beachhead	Accounts, verification, listings, property verification, search, core AI Rental Assistant, matching, property details, messaging, viewing bookings, administration, and analytics.
Transaction Layer	Applications, screening, lease management, protected funds, rent payments, deposits, receipts, and reconciliation.
Tenancy Layer	Move-in, tenancy records, move-out, deposit reconciliation, reviews, reputation, and dispute resolution.
Experience Expansion	360 tours, immersive walkthroughs, selected AR property experiences, and advanced virtual viewing capabilities.
Scale & Intelligence	Advanced recommendation intelligence, fraud scoring, personalization, marketplace intelligence, and automated operations.

Regulatory and governance note: escrow, payments, KYC/AML, electronic signatures, tenancy law, data protection, and AI-enabled capabilities must be adapted to applicable legal, licensing, provider, privacy, and governance requirements in each HauxHunt launch jurisdiction.
